### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-29 are rejected under 35 U.S.C. 103(a) as being unpatentable over Haino (5,089,366) in view of Law (2003/0113643). Haino teaches similar photoreceptors where the charge transport material contains a phenothiazine group, a phenoxazine group, or a phenazine group (col. 27-30). Haino does not specifically teach linking multiple phenothiazine groups, phenoxazine groups, or phenazine groups together. Law teaches linking similar charge transport materials together through the use of a linking group in similar organophotoreceptor applications. It would have been obvious to one of ordinary skill in the art to link the phenothiazine groups, phenoxazine groups, or phenazine groups taught by Haino in a similar manner as taught by Law because of the known use of similar related charge transport materials and the expectation of similar results due to the linked groups.
